

Drinking water system

For your crew

DOE DRINKING WATER SOLUTION

Our plan to get rid of plastic bottles

Example of one of the deliveries
With the crew of 70 people, daily usage of water two 1,5l bottles per person, the ship generates 140 used plastic bottles per day, which is 4200 bottles per month

Fresh water from sanitary system

- Viruses and bacteria removal (RO)
- Quality check (electromagnetic valve)
- Scent removal (carbon filter)
- Kill bacteria (UV Sterilizer)
- Add minerals (Mineral bed)
- Adjust PH (Mineral bed)
- Chill (Non-freon chiller)
- Store for usage

Drink from the tap
or from your personal bottle

DRINKING SYSTEM **key information:**

Using DOE Stork Drinking you are ready to supply **up to 20l per hour** of safe and tasty drinking water.

Drinking water is filtrated with RO for bacteria and viruses, carbon for smell and mineralized for better taste and positive effects on your body. Before storage the water is treated with UV and chilled for better drinking experience.

In the end you save the money on water and protect the environment from plastic.
